[Resmed Escape S8 Manual](#)

Problem/Possible Cause	Solution
------------------------	----------

Displays error message: SYSTEM ERRxxxx Call Service! or Exxxx (where xxxx defines an error)

Component failure.	Record error number and call service.
--------------------	---------------------------------------

Displays error message: Check tube!! Key if done

Air tubing is loose or blocked.	Check that the air tubing is connected securely to your mask and the air outlet to the front of the S8 Series II. When you have checked the air tubing, press the Start/Stop key to restart the device. If this does not clear the message, disconnect the power cord and then reconnect it to restart the device.
---------------------------------	--

The following message is displayed on the LCD after you try to update settings or copy data to the Data Card: Card Error Remove Card

Data Card is not inserted correctly.	Check that the patient is inserting the Data Card into the Data Card module with the arrow facing up, while the S8 Escape II is switched on and not delivering therapy (standby mode).
The Data Card is only partly inserted.	Ensure that the Data Card is inserted into the Data Card slot as far as it will go.
You may have removed the Data Card before settings were copied to the S8 Escape II.	Reinsert the Data Card and wait for the Settings Success Remove Card message to appear on the LCD.
The card is not a ResScan Data Card.	Only use a ResScan Data Card.

The following message is displayed on the LCD after you try to update settings or copy data to the Data Card: Settings Error Remove Card

There is a data error on the Data Card.	Contact your clinician immediately.
---	-------------------------------------

The following message is NOT displayed on the LCD after you try to update the settings using the Data Card: Settings Success Remove Card

The settings were not updated.	Contact your clinician immediately.
--------------------------------	-------------------------------------

The following message is displayed on the LCD after you try to update settings or copy data to the Data Card: Settings Invalid Remove Card

The identification details on the Data Card do not match the identification details on your device.	Contact your clinician immediately.
---	-------------------------------------
